SETCRETE TRAINING COURSES

F. Ball and Co. Ltd.

PROFESSIONAL FLOORING PRODUCTS FOR THE MASTER TRADESMAN

DEDICATED TO OFFERING THE BUILDING INDUSTRY HIGH PERFORMANCE AND USER FRIENDLY FLOOR PREPARATION PRODUCTS

The Setcrete™ range of products is formulated and manufactured by F. Ball and Co. Ltd., the UK's leading manufacturer of flooring adhesives and floor preparation products. Utilising expertise from the contract flooring industry, the company has developed a range of straight forward floor preparation products which are now available to the general building trade for the first time.

Setcrete products incorporate the latest developments in cement technology to produce high performance general floor levelling compounds for internal areas as well as solutions for specific flooring requirements, such as raising floor levels and smoothing flexible subfloors.

Setcrete training courses provide an introduction to the use of these products for tradesmen who have limited experience of using floor preparation materials or for those who simply need a refresher.

Courses are held throughout the year and details of available dates can be found on the Setcrete website.

Thank you for your interest in Setcrete training courses and we look forward to welcoming you.

TRAINING CENTRE FACILITIES

All Setcrete training courses take place within the F. Ball Training Centre which is located near Leek in Staffordshire.

This state-of-the-art facility comprises a large conference room which can easily accommodate up to 30 people and includes the latest presentation technology in a comfortable, climate-controlled environment.

There are two separate meeting rooms and a relaxing, bistro-style refreshment area where lunch is served.

In addition, a large practical demonstration zone has been created to enable all participants to apply a range of Setcrete products during training courses.

WHAT IS THE COURSE ABOUT?

Setcrete training courses are designed to be an introductory guide to preparing the subfloor and achieving a smooth and level base ready for the installation of new decorative floorcoverings.

The stages of a flooring installation that are covered on the course include:

- Subfloor moisture measurement and testing
- Controlling subfloor moisture
- Priming
- Floor levelling compound selection and application

Prior to attending a course, we ask all delegates to complete a pre-course questionnaire which gives them the opportunity to highlight any specific subjects they would like to cover and enables the course leader to pay particular attention to those areas.

Who is the course aimed at?

Our courses are aimed at professional tradesmen of all skill levels who wish to improve their knowledge of preparing subfloors ready for the installation of new decorative floorcoverings.

We also welcome merchants who would like to increase their awareness of subfloor preparation techniques and become more familiar with Setcrete products.

What format does the course take?

Presentations are combined with practical demonstrations throughout the day and full course notes are provided. In this way participants understand the performance benefits of each product as well as how to apply them. There is no formal assessment although participants are expected to take part in practical work and group discussions. Where possible, a tour of our recently extended manufacturing facility is included.

Courses are held over one day and groups are kept to a maximum of ten people to allow everyone to fully participate. On successful completion, all delegates will receive a signed certificate of attendance for their records.

Who presents Setcrete training courses?

All courses are presented by members of our Technical Department who have considerable knowledge of the flooring industry and are highly experienced in the day to day challenges presented by flooring preparation projects.

Is lunch provided?

A buffet lunch and refreshments throughout the day are provided.

Any dietary requirements or food allergies must be advised on the pre-course questionnaire that is sent out to all delegates.

BOOK A PLACE

Course Dates

Training courses are held regularly throughout the year. Future course dates are published on the Setcrete website.

Booking a place

There are various ways to book a place on our courses:

- Online – please complete a booking form at www.setcrete.co.uk
- Phone – **01538 361633**
- E-mail – send your contact details to contact@setcrete.co.uk and we will contact you.

PLACES TO STAY

Accommodation

Accommodation is not provided for any of our courses. However, we have a list of local hotels and guest houses available that we are able to send out upon request. We have specially negotiated rates with some of these hotels (see list for details); to take advantage of these rates please mention F. Ball when making a reservation.

HOW TO FIND US

Directions North & South

Exit the M6 at Junction 15. Exit toward Stoke on Trent/A500. Continue on the A500 for 2 miles, then take the A50 exit and at the roundabout, take the 2nd exit onto the A50 (signposted Uttoxeter).

Leave the A50 at Meir (before tunnel) and take the A520 (direction Leek) for 8 miles to Cheddleton Village. Turn right after river bridge into Station Road. F. Ball is (0.5 miles) on the right.

Directions Northbound

Exit the M1 at junction 24, East Midlands Airport. Take the A50 (directions UTTOXETER and STOKE). Leave the A50 at Meir (before tunnel) and take the A520 (direction LEEK) for 8 miles to Cheddleton Village. Turn right after river bridge into Station Road. F. Ball is (0.5 miles) on right.

Directions Southbound

Exit the M1 at junction 28. Follow the A38 to Derby, then take the A52 to Ashbourne.

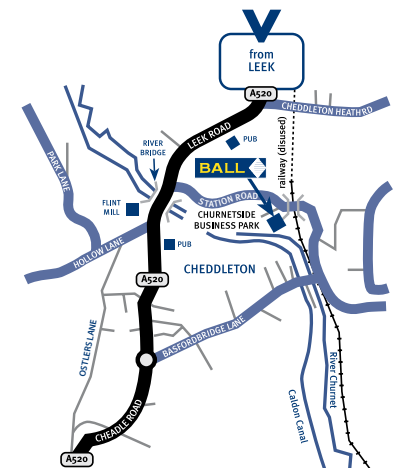

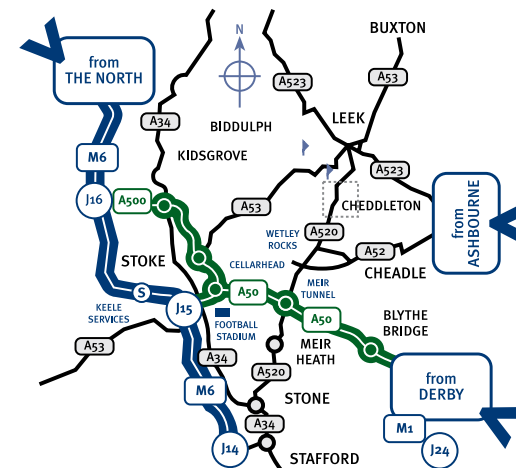

Continue through Ashbourne (direction LEEK) until the A52 becomes the A523. Continue to Leek and take 1st exit left at the roundabout then left again at the traffic light crossroads.

Follow A520 (direction STONE) for 3 miles to Cheddleton Village. Turn left before river bridge into Station Road. F. Ball is (0.5 miles) on right.
